REITER SOFTWARE

COOKING OIL SERVICE TIER SOFTWARE OVERVIEW

A Message From Our Founder

The Reiter Companies (Reiter Consulting, Reiter Trading, Reiter Software) have been dedicated to the success of Used Cooking Oil (UCO) collectors and BioFuel producers since 2007.

For over ten years our clients have voiced the same complaint "there just isn't a good software platform for MY BUSINESS!!" So, we created one. With the input of collectors all over the country we're proud to offer the market our Cooking Oil Service Tier (COST) platform.

We truly believe that the products coming out of our software division allow ANYONE to run their cooking oil collection business like a seasoned pro. Give us a call, give it a try, and take your business to the next level.

Kristof Reiter (founder)

Cooking Oil Service Tier (C.O.S.T.) Software

The C.O.S.T platform allows Used Cooking Oil Collectors to scale-up, optimize, and professionalize their operation quickly, seamlessly, and at a fraction of the cost of additional office personnel.

Premier Features of the C.O.S.T. Software

- Reduce Your Fuel Usage & Vehicle Maintenance

- Schedule & Optimize Your Routes

- Eliminate Duplicate Date Entry

- Guaranteed Data Security

Reducing Your Fuel Usage & Vehicle Maintenance

The C.O.S.T. Software is smart software that creates routes for YOU!

- Is there an accident where your truck is headed?

- Have your trucks been taking longer routes and wasting valuable time?

- Are your fuel costs just too high?

- Are you taking your trucks in to get maintenance too often?

Don't worry, we've got your solution!

Scheduling & Optimizing Your Routes

With our state-of-the-art software, you can easily schedule, edit, and delete routes!

- Drivers, vehicles, and restaurants are saved for future use!

- The C.O.S.T. Software creates the best route for your trucks where ever they're headed!

- Easily use Google Maps to avoid any traffic and accidents

- Add all your company identification to personalize your software!

Eliminating Duplicate Data Entry

Are duplicate and paper data entries making your company run a lot slower and less efficient?

- With the C.O.S.T. Software, we promise to eliminate duplicate data entry to help your company and routes be more efficient.

- Our smart software also eliminates the need for paper notes!

- With the C.O.S.T. Software, your operations will run smoother, your data will be accurate and backed up, and your company data will always be secured with us!
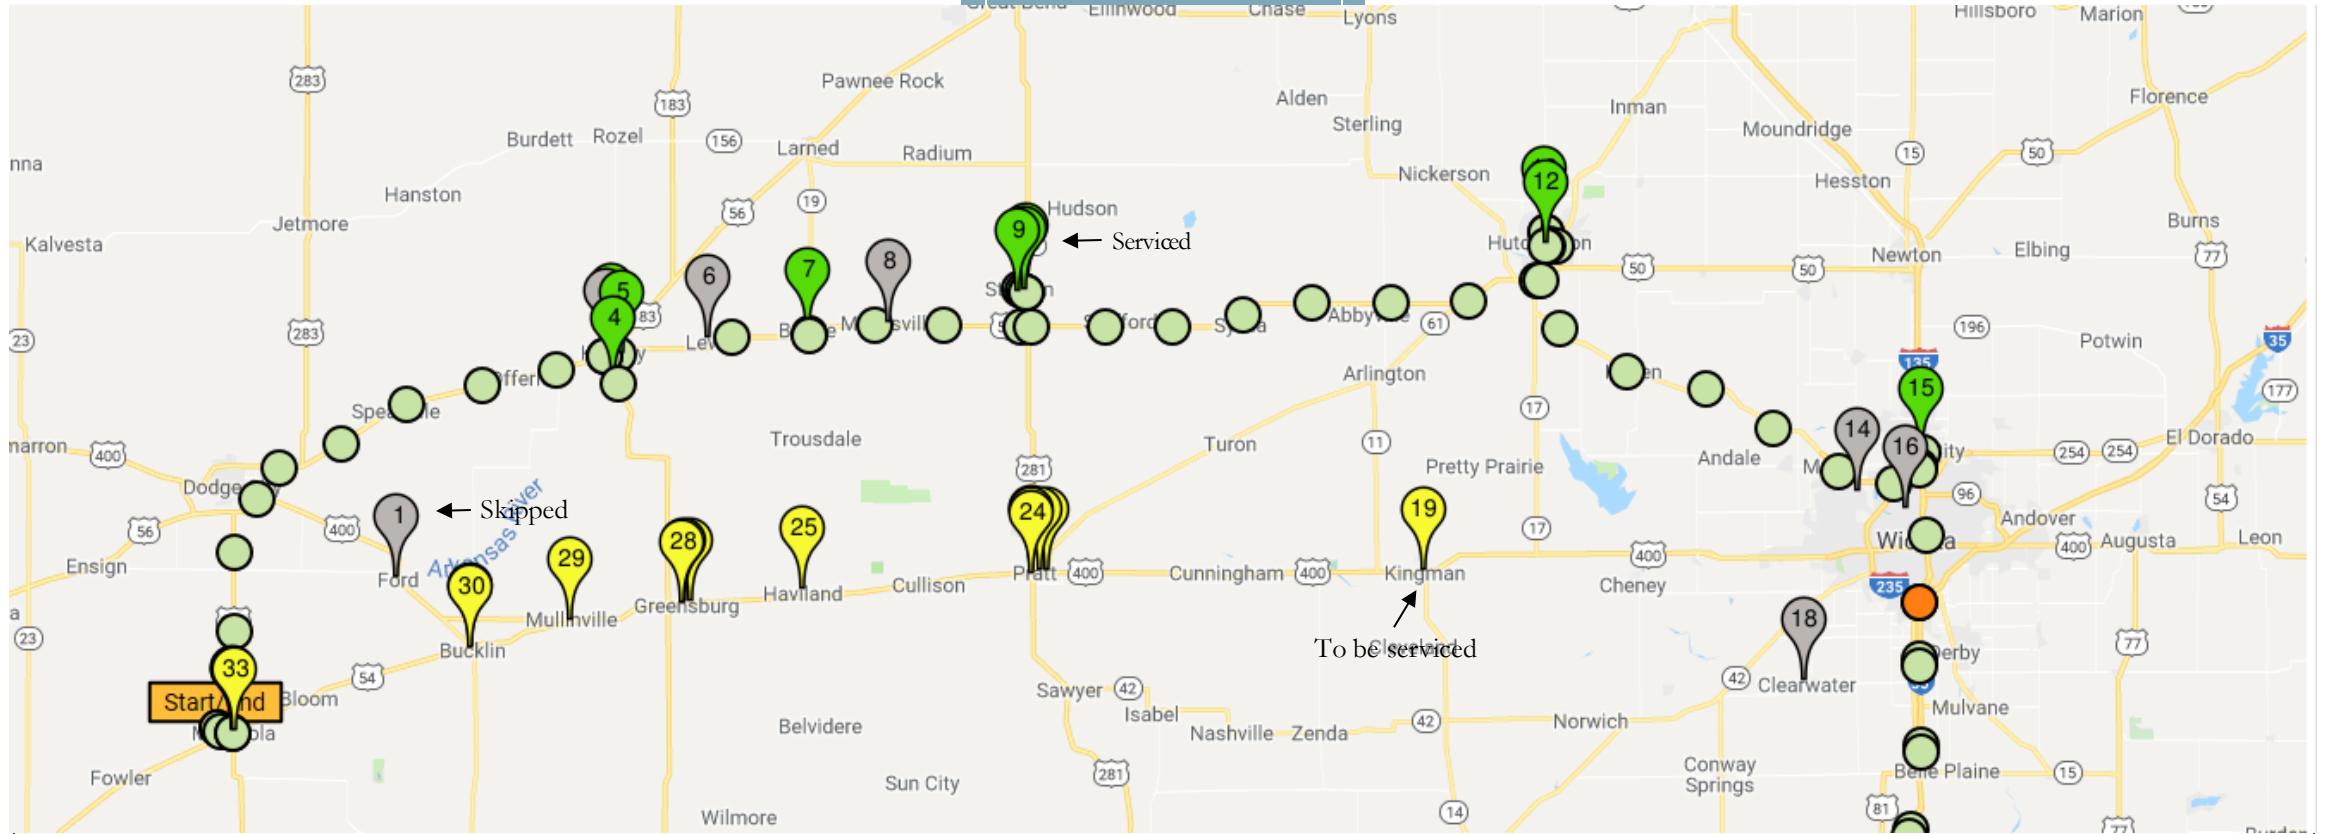

Guaranteed Data Security

We know your Used Cooking Oil Collection data is both valuable and critical to Your operation!

- The C.O.S.T. platform is fully encrypted and regularly backed up.

- We utilize commercial grade encrypted Amazon servers to ensure reliability.

- And of course, we do not share or sell customer data.

Your private data is safe with us!

AN EXCLUSIVE LOOK INTO OUR SOFTWARE

MOBILE DATA ACQUISITION

Click arrive, skip, or move

Enter Total Fill Level

Enter unpumpable amount and reason

Enter reason for skipped stop and amount in skipped container

The CHOICE is CLEAR

The C.O.S.T. platform is GAME CHANGING.

- Your feedback drives feature development, resulting in very powerful and industry specific capabilities.

- If there is an issue with the software, we will fix it because we want to help you!

- Our software saves you time because it takes seconds to enter data and information

- Our software saves you more than it C.O.S.T.s

All this and more is possible with the C.O.S.T. Software!
